

Billons and billions of dollars is not enough for the NAB?

I would like to have the choice to pay for what i want and need. Instant traffic is an invaluable tool to me and my wife. We cannot always hear what we need to in time for it to assist us in getting to where we want to go. Have you ever tried to get a traffic report at 2pm or 10pm for that matter? It simply is not possible unless i have access to XM.

Satellite radio should have the right to provide their customers with local weather and traffic report. I pay for XM Radio and enjoy the easy updates. The National Association of Broadcasters has no right to decide what I or anyone can listen to. If XM Radio is denied this right it would similar to the major TV trying to deny cable providers from broadcasting The Weather Channel. It makes no sense. I ask the FCC to reject NAB's petition 04-160. This is nothing more than an attempt by an organization with a large group of lobbyists try to deny customers our freedom to listen to whatever we want.
